

KIDS FOR CLEAN WATER

**A full circle program that gives children
the opportunity to see real change
through their actions.**

For participating schools in the Vancouver region only.

OUR **FULL CIRCLE PROGRAM** GUIDES STUDENTS THROUGH FIVE STAGES:

LEARN

The importance of water and the current global water crisis are integrated into curriculum at every grade, making students aware of why water is so important and inspiring them to help.

TAKE ACTION

Kids come together to create dynamic student-led fundraisers. Working together with peers, teachers, family and community, they experience first-hand the power of collective collaboration.

SEE RESULTS

Once students attain their fundraising goal, we direct 100% of donations immediately to a community in need, drilling a water well to help thousands of people. We manage donations every step of the way.

CONNECT

We connect students to the village they helped through regular updates. This connection helps students see the success and growth of the village as a result of clean water access. This helps them appreciate the impact of their contribution.

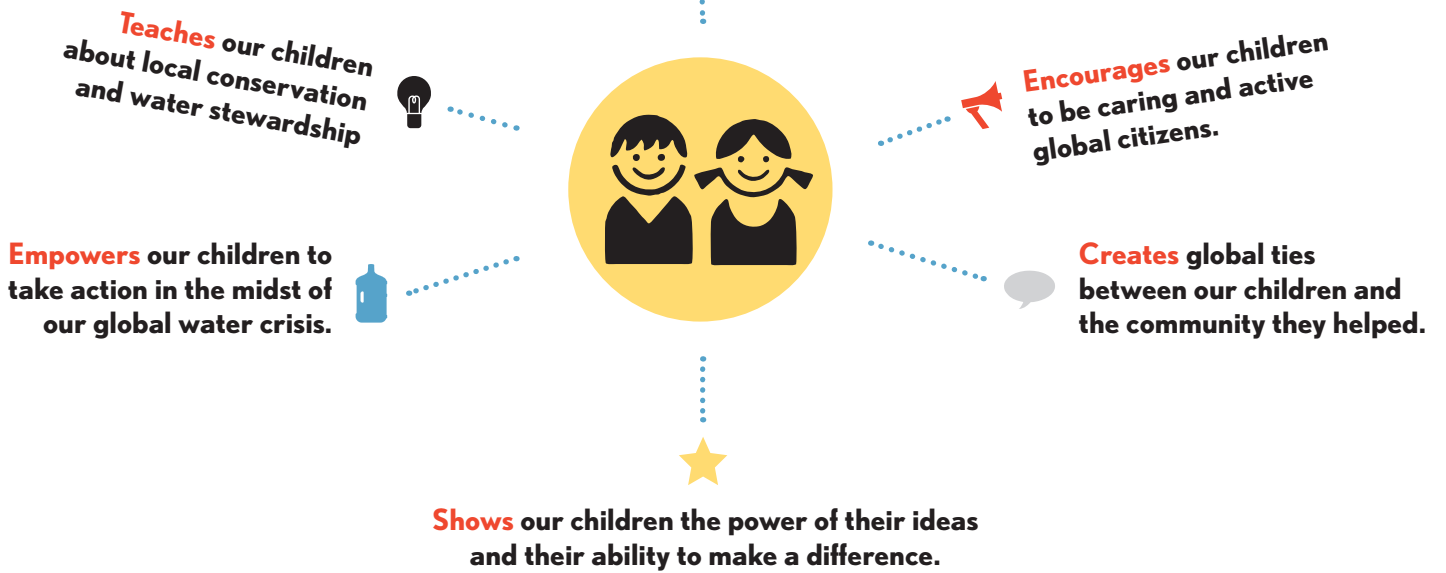

CELEBRATE

We bring together all the participating schools to celebrate their collective success in one big wrap-up party. This gives students an opportunity to celebrate their achievements and to connect with peers across their region.

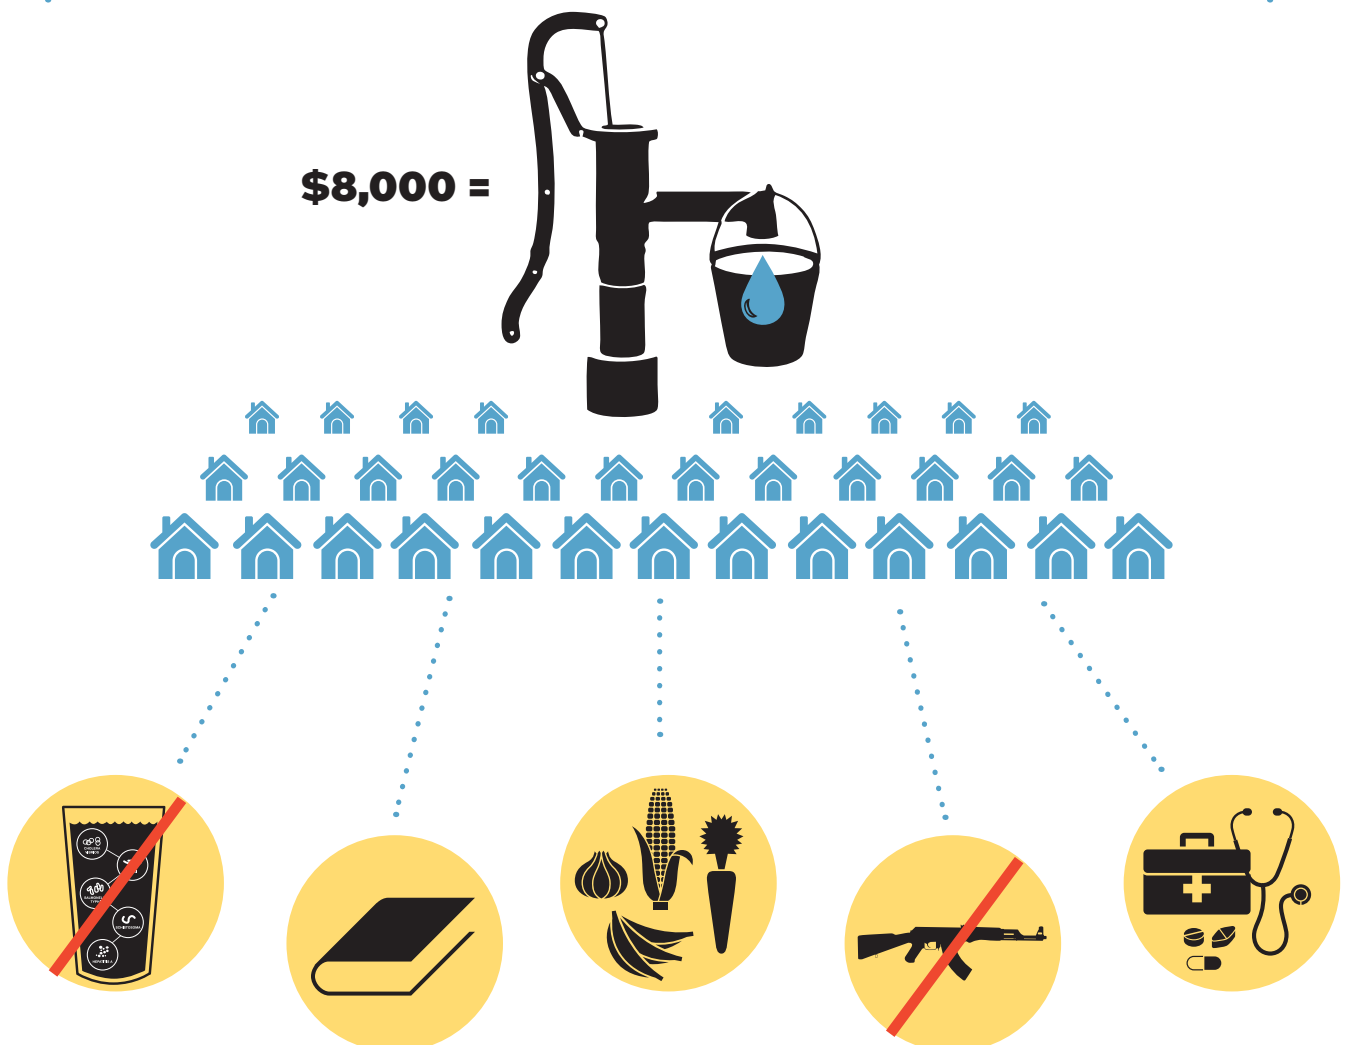

KIDS FOR CLEAN WATER

is a custom education-based program that is designed to impact the children fundraising as much as it impacts the village receiving water.

HOW IT IMPACTS OUR KIDS

HOW IT IMPACTS A VILLAGE

ABOUT OBAKKI FOUNDATION

Obakki Foundation is a non-profit that harnesses the power of creativity to bring clean water and education to developing countries.

100% of donations go directly to our projects.

**850 wells
drilled to date
bringing clean
water to over
1,000,000
people**

THE INSPIRATION

The Obakki Foundation Kids For Clean Water Program was inspired by a group of 64 kids in a small school in BC. After hearing about the water need in other parts of the world, they decided they would help. In six weeks, these children came together and raised over \$8,000 to drill a clean water well in South Sudan.

**Not only did they change the lives of thousands of people,
but they changed their own.**
